Access to Capital

The following is an excerpt from the [2023 RFA Overview](#):

"Because the central issues in the litigation that led to NAAF's creation involved access to capital, NAAF requires all applicants to incorporate strategies that will improve access to capital by Native farmers and ranchers in their proposed activities. Access to capital can be shown by any of the following types of activities: business planning or market planning training; financial education; record keeping; credit repair activities; targeted credit application training or technical support; risk analysis and related activities to prepare Native farmers and ranchers as they seek capital to support their enterprises. ...

... Capital is always needed in agriculture enterprises and will always be relevant to those involved in food and agriculture. NAAF has increased the weighting we apply to this evaluation criteria as we review all applications. **Applications that are absent any discussion of access to capital or management of agricultural risk will not be considered for funding.** We encourage you to view our video on [access to capital](#) and Evaluation Criteria section on pages 21-22 of the RFA overview for more information."
